

PRESS RELEASE

COMMUNITY CENTRE, BELFAST

The A. Proctor Group recently supplied their high specification pitched roof underlay, Roofshield, to D. Harkin & Co Roofing Contractors to renovate Duncairn Presbyterian Church into a Centre for Arts, Culture and Heritage.

Roofshield has unique vapour and air permeability characteristics, which allows even the most complex of pitched roofs to breathe - without the need for traditional air gaps or secondary venting products. Roofshield is as easy to install as traditional roofing felt.

The benefits provided by the high performance Roofshield membrane were obvious to the specifiers, Doherty Architects of Belfast. The very low vapour resistance of 0.09MNs/g combined with high air permeability reduces the potential for interstitial condensation as far as is possible, and without the requirement to use a vapour control layer, thus giving a robust and dependable solution that can be specified with confidence.
